

The Spinone Italiano

The Spinone is one of the oldest gun dog breeds, appearing on tapestries as far back as the Middle Ages.

The name Spinone comes from the word "spino" which means thorn. The Spinone's thick skin and coat enable it to hunt through "spino"-bush terrain; terrain which could injure a dog not so well-armored.

The AKC Standard* in Word and Picture

*Approved February 11, 2000

Huge Thank Yous to:
Carolyn Fry, for graciously allowing me to use photos from her book, *The Italian Spinone*. www.carolynfry.com
Rosalind Trigg, for generously allowing me to use photos of her paintings as well as her photos from Italy. www.nobledogs.com

.

• Muscular dog with powerful bone.

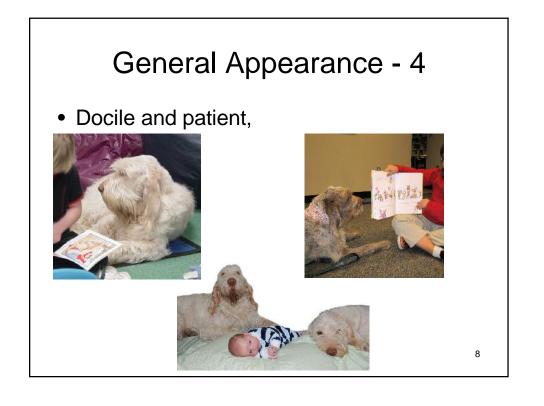

5

General Appearance - 2

 Vigorous and robust, his purpose as hardworking gun dog is evident.

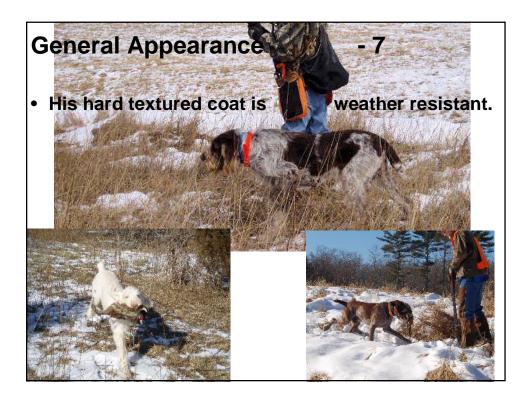

• His dense coat and thick skin

13

General Appearance - 9

• enable the Spinone to negotiate underbrush

• and endure cold water that would severely punish any dog not so naturally armored.

General Appearance - 11

 He has a remarkable tendency for an extended and fast trotting gait.

• The Spinone is an excellent retriever by nature.

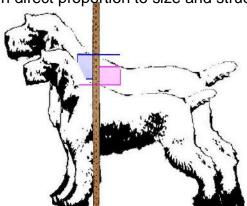

Size:

• Height: The height at the withers is:

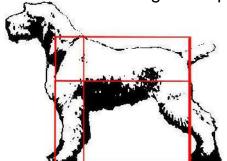

Males: 23 to 27 inches Females: 22 to 25 inches *Weight:* In direct proportion to size and structure of dog.

,

Proportion:

• *Proportion:* His build tends to fit into a square. The length of the body, measured from sternum to point of buttocks, is approximately equal to the height at the withers with tolerance of no more than 1 inch in length compared to height.

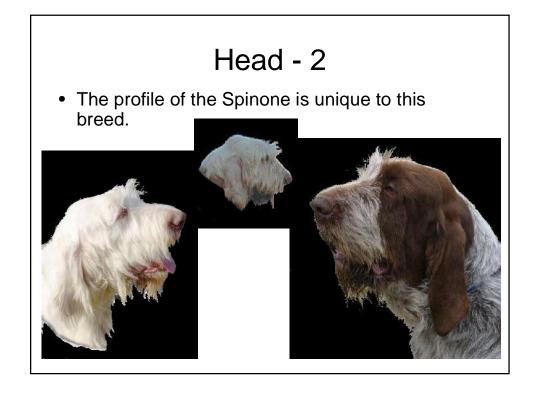

19

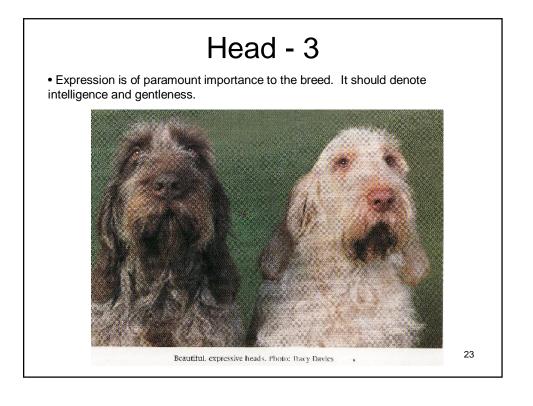

Substance:

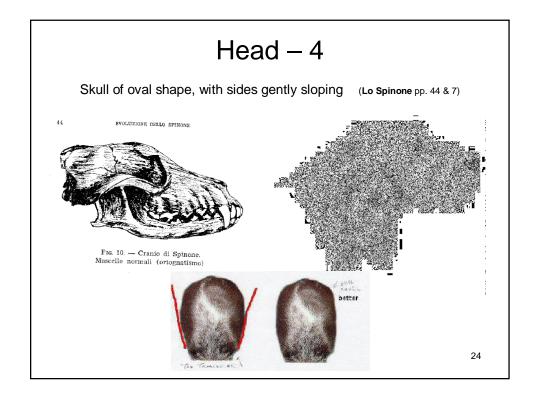

• Substance: The Spinone is a solidly built dog, robust with powerful bone.

- Occipital protuberance well developed,
- Medial-frontal furrow is very pronounced.

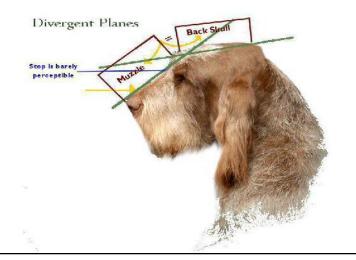

25

Head - 6

 Muzzle: Square when viewed from the front. Muzzle length is equal to that of back skull. The planes of the skull and muzzle are diverging, down-faced.

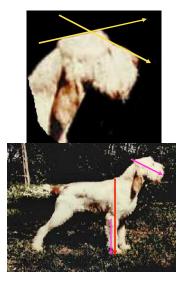

Head - 7

• Its width measured at its midpoint is a third of its length.
Stop is barely
perceptible.

Remember...

- Long Head
- **Divergent Planes** (head length is 40% of height at withers)

27

Head - 8

Bridge of the muzzle is preferably slightly Roman, however, straight is not to be faulted. Lips fitting tightly to the jaw line. Convergence of planes of the skull and muzzle or a dishfaced muzzle is to be faulted so severely as to eliminate from further competition.

Eyes - 1

 Eyes: Must have a soft sweet expression. Ochre (yellowish brown) in color, darker eyes with darker colored dogs, lighter eyes with lighter colored dogs. Large, well opened, set well apart, the eye is almost round.

Eyes - 2

the lids closely fitting
the eye, to protect the
eye from gathering
debris while the dog is
hunting, loose eye lids
must be faulted. Which
is neither protruding
nor deep set. Eye rim
clearly visible, color
will vary with coat color
from flesh colored to
brown.
Disqualification:
Walleye.

Nose

Nose: Bulbous and spongy in appearance with upper edge rounded. Nostrils are large and well opened. In profile, the nose protrudes past the forward line of the lips. (Pigment is flesh colored in white dogs, darker in white and orange dogs, brown in brown or brown roan dogs.) Disqualification: Any pigment other than described or incomplete pigment of the nose is to be disqualified.

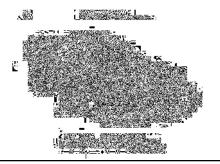

3

Teeth

 Teeth: Jaw is powerful. Teeth are positioned in a scissors or level bite.
 Disqualification: Overshot or undershot bite.

Ears

Ears: Practically triangular shape. Set on a level just below the eye, carried low, with little erectile power. The leather is fine, covered with short, thick hair mixed with a longer sparser hair, which becomes thicker along edges. Length, if measured along the head would extend to tip of nose and no more than 1 inch beyond the tip. The forward edge is adherent to the cheek, not folded, but turned outward; the tip of the ear is slightly rounded.

Neck, Topline & Body - 1

 Neck: Strong, thick, and muscular. Clearly defined from the nape, blending in to the shoulders in a harmonious line. The throat is moderate in skin with a double dewlap.

Neck, Topline & Body - 2

• Chest: Broad, deep, well muscled and well rounded; extending at least to the elbow. The ribs are well sprung. The distance from ground to the elbow is equal to 1/2 the height at the withers.

35

Neck, Topline & Body - 3

 Back: The topline consists of two segments. The first slopes slightly downward in a nearly straight line from the withers to the 11th thoracic vertebrae, approximately 6 inches behind the withers. The second rises gradually and continues into a solid and well-arched loin. The underline is solid and should have minimal tuck up.

Neck, Topline & Body - 4

 Croup: Well muscled, long. The hipbones fall away from the spinal column at an angle of about 30 degrees, producing a lightly rounded, well filled-out croup.

37

Neck, Topline & Body - 5

 Tail: Follows the line of the croup, thick at the base, carried horizontally or down; flicking from side to side while moving is preferred. The tail should lack fringes. It is docked to a length of 5 1/2 to 8 inches. Tail habitually carried above the level of the back or straight up when working is to be penalized.

Forequarters - 1

Shoulders: Powerful and long, withers not too prominent; forming an angle with the upper arm of approximately angle 105. With well-developed muscles, the points of the shoulder blades are not close together. The ideal distance between the shoulder blades is approximately two inches or more. Angulation of shoulder is in balance with angulation in the rear.

Forequarters - 2

Forelegs: The forelegs are straight when viewed from the front angle with strong bone and well-developed muscles; elbows set under the withers and close to the body. Pasterns are long, lean and flexible following the vertical line of the forearm. In profile, they are slightly slanted.

Wynsett Jumpin' Jack Flash, aged 5, Top sire 1996 and 1997.

Forequarters - 3

 Feet: Large compact, rounded with well-arched toes, which are close together, covered with short, dense hair, including between the toes. Pads are lean and hard with strong nails curving toward the ground, well pigmented, but never black. Dewclaws may be removed.

4

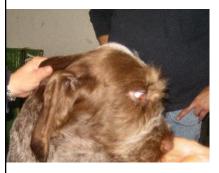

Hindquarters

Thighs are strong and well muscled, stifles show good functional angulation, lower thigh to be well developed and muscled with good breadth. The hock, with proportion of 1/3 the distance from the hip joint to foot being ideal, is strong, lean and perpendicular to the ground. Fault: Cow hocks. Feet: Slightly more oval than the forefoot with the same characteristics. Dewclaws may be removed.

Skin

 The skin must be very thick, closely fitting the body. The skin is thinner on the head, throat, groin, under the legs and in the folds of the elbows is soft to the touch.
 Pigmentation is dependent upon the color or markings of the coat. Disqualification: Any black pigmentation.

Coat -1

 A Spinone must have a correct coat to be of correct type. The ideal coat length is 1 1/2 to 2 1/2 inches on the body, with a tolerance of 1/2 inch over or under the ideal length.

Coat - 2

 Head, ears, muzzle and front sides of legs and feet are covered by shorter hair. The hair on the backsides of the legs forms a rough brush, but there are never any fringes. The eyes and lips are framed by stiff hair forming eyebrows, mustache and tufted beard, which combine to save fore face from laceration by briar and bush.

Coat - 3

 The coat is dense, stiff and flat or slightly crimped, but not curly, with an absence of undercoat.

Coat - 4

• The Spinone is exhibited in a natural state. The appearance of the Spinone may not be altered. The dog must present the natural appearance of a functional field dog. Dogs with a long, soft or silky coat, the presence of undercoat, or any deviation of the coat is defined in this as well as excessive grooming, i.e., scissoring, clipping, or setting of pattern shall be severely penalized as to eliminate them from further competition.

47

Color - 1

 The accepted colors are: Solid white, white and orange; orange roan with or without orange markings;

Color - 2

• white with brown markings, brown roan with or without brown markings. The most desired color of brown is chestnut brown, "monks habit", however, varying colors of brown are acceptable. Disqualification: Any black in the coat, tan, tri-color, in any combination, or any color other than accepted colors.

49

Gait - 1

 The Spinone is first and foremost a functional working gun dog. Its purpose as a versatile hunting dog must be given the utmost consideration.

Gait - 2

 Easy and loose trot geared for endurance. Maximum ground is covered with least amount of effort, which his purpose as a versatile working gun dog demands. Profile of the topline kept throughout the trotting gait, light body roll in mature bitches is characteristic of the breed.

Gait - 3

 While hunting, an extended fast trot with intermittent paces of a gallop allows the Spinone to cover ground quickly and thoroughly. Any characteristics that interfere with the accomplishment of the function of the Spinone shall be considered as a serious fault.

Faults

 Any departure from the foregoing points constitutes a fault which when judging must be penalized according to its seriousness and extension.

53

Disqualification

- Wall Eye
- Any pigment other than described or incomplete pigment of the nose.
- Overshot or undershot bite.
- Any black pigmentation.
- Any black in the coat; tan, tri-color markings in any combination, or any color other than accepted colors.

Understanding the Standard

• Total Words in Standard: 1444

• Head 374 words = 26%

• Skin & Coat 275 words = 19%

• Gait 125 words = 9%

.....etc.

• Croup 26 words = 2%

55

Words Used Multiple Times

- Muscular, well-muscled, well-developed muscles (6)
- Powerful Bone, strong bone (3)
- Robust (2)
- Working Gun Dog, Hunting Dog (5)
- •Expression (gentle, soft & sweet) (2)

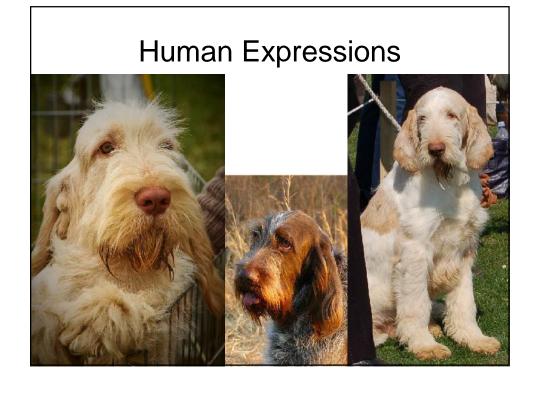

Head & Expression are Paramount

Eyes

- Set on the Frontal Plane
- Creates the Human Expression

Adolescent vs. Mature

- Often in the U.S., the show entry will not have any mature dogs entered.
- The "teen age" look is not correct for an older dog. Teen age is ok, when the dog IS an adolescent, but not at 4, 5, 6 years old.

J

Conclusion

The Spinone is first and foremost a functional working gun dog. Its purpose as a versatile hunting dog must be given the utmost consideration.
